

I'm a multi-disciplinary designer specializing in crafting intelligent and easy-to-use interfaces. I love solving challenging problems and combining my expertise with business objectives.

01. SKILLS

- User Interface Design
- User Experience Design
- Logos & Branding
- HTML5/CSS3/Javascript
- AI-First Prototyping and Development
- Copywriting
- Digital Illustration
- And more

02. EXPERIENCE

Livingstones Studio

Founder & Design Partner

2023–Present

For the past few years I've been running my own design studio. I've worked across a range of brands, building platforms, website, brands, and more. Along the way, I've contracting with Overline Studio since 2025 and have worked with large brands like Bessemer Venture Partners and Patriot Software rebuilding whole platforms and enterprise websites.

Dreamten

Senior Product Designer

2022–2024

At Dreamten I've worked on a variety of products, industries ranging from Web3 and crypto startups to the nation's largest outdoor living firm. Data-driven solutions were developed through a combination of usability studies, business analysis, and product architecture deep-dives paired with thoughtful, strategic, and conversion-focused design.

03. EDUCATION

The Art Institute of Raleigh-Durham

Bachelor of Arts in Graphic Design

2010–2013

Steadfast Design Firm

Creative Director & Lead Developer

2014–2022

I started out with Steadfast as a Senior Designer and Developer and now work as a Creative Director (still designing, while also leading others) and Lead Developer (actively developing and leading others to ensure consistency and quality). I interact with clients regularly on projects, both at the beginning stages (briefings, proposals, etc) and all throughout the project. As Steadfast is a full-service agency, I've had my hands on product design, web design, development, app design, print, branding—everything.

Freelance

Design and Development

2008–Present

For nearly a decade I've been working with clients in a variety of industries (including universities, software, construction, photographers, churches, non-profits and many more) building and developing unique websites, brands, and a variety of digital and print pieces.

The Art Institute of Raleigh-Durham

Adjunct Instructor

2016

I taught both design and development classes that focused on creating functional, easy-to-use web experiences. These courses ranged from intermediate to advanced level.

Baptist State Convention of NC

Graphic Designer & Developer

2012–2014

While with the Convention I worked with various ministries to promote their cause, events, and resources through both print, web design, and development. This includes websites, email templates, brochures, posters, environmental design, t-shirts, web advertising, print advertising, presentations, postcards, and many others. I also served as a part of the Convention's Web Team which focused on user experience and intuitive design.
